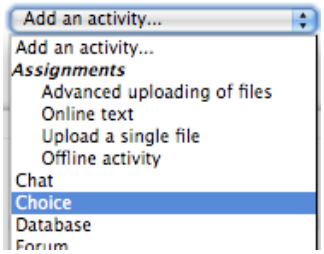
Add a Choice Activity to Your Moodle Course...

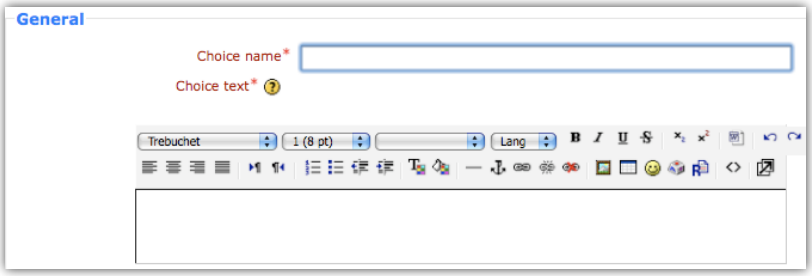
A Choice activity allows the instructor to ask a single question and have students respond by selecting one of the answer choices. A Choice activity can be used for polling students, taking a quick vote, and for many other simple Q&A purposes.

- Login to O.zone mymoodle and navigate to your course
- Click the "Turn editing on" button in the top right corner of the window

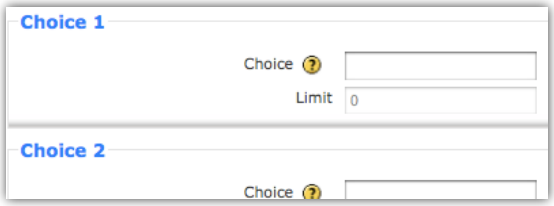
- Go to the topic/week to which you want to add a Choice activity, click the "Add an activity..." drop down menu and select *Choice* from the list



- The editing window for creating your Choice activity will load
- In the "General" section, type a title for your Choice activity in the *Choice name* field and type the question text in the *Choice text* field



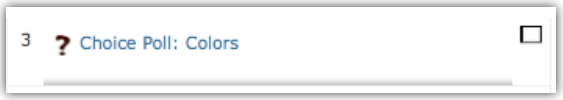
- Set the limit of choices allowed, if needed
- Fill in the answer choices in the "Choice" sections (if you need more answer choices, click the "Add 3 fields to form" button below the "Choice" sections)



- Complete the rest of the form as desired
- Note: the *Publish results* setting is a great one to set because it allows you to select when and how to show the *Choice* results to your students (students love to see results)

Note: for more information about a specific setting, click the question mark next to the setting

- When the form is complete, click the "Save and return to course" button
- Success! Your Choice activity shows in your course topic/week



- Students click the link to answer the Choice activity
